NEPHROCARE

Our Vision

To be a trusted leader in kidney care, offering innovative and comprehensive treatments. We strive to improve patients' quality of life through advanced medical practices. Compassion and excellence are at the core of everything we do.

Our Mission

To provide personalized and evidence-based kidney care for patients of all ages. We aim to educate and empower individuals about kidney health and early detection. Our goal is to create a healing environment with trust and transparency.

A personalized and comfortable Kidney Disease care

01.

Acute Kidney Injury

Our specialized care focuses on the early detection, treatment, and recovery of kidney function in AKI patients. With advanced therapies and expert guidance, we ensure swift and effective management for better outcomes.

02.

Chronic Kidney Disease

We provide comprehensive care for CKD, focusing on slowing disease progression, improving kidney function, and enhancing overall quality of life. Our expert team tailors treatments to meet individual needs with compassion and precision.

03. Glomerulonephritis Treatment

Glomerulonephritis treatment typically involves medications such as immunosuppressants, blood pressure control, and, in severe cases, dialysis or kidney transplantation.

04. Dialysis Treatment

A life-saving procedure that removes waste, toxins, and excess fluids from the blood when the kidneys can no longer function properly.

05. Hypertension and Kidney Disease

Hypertension can cause kidney damage, and kidney disease can worsen high blood pressure, creating a harmful cycle that requires careful management of both conditions.

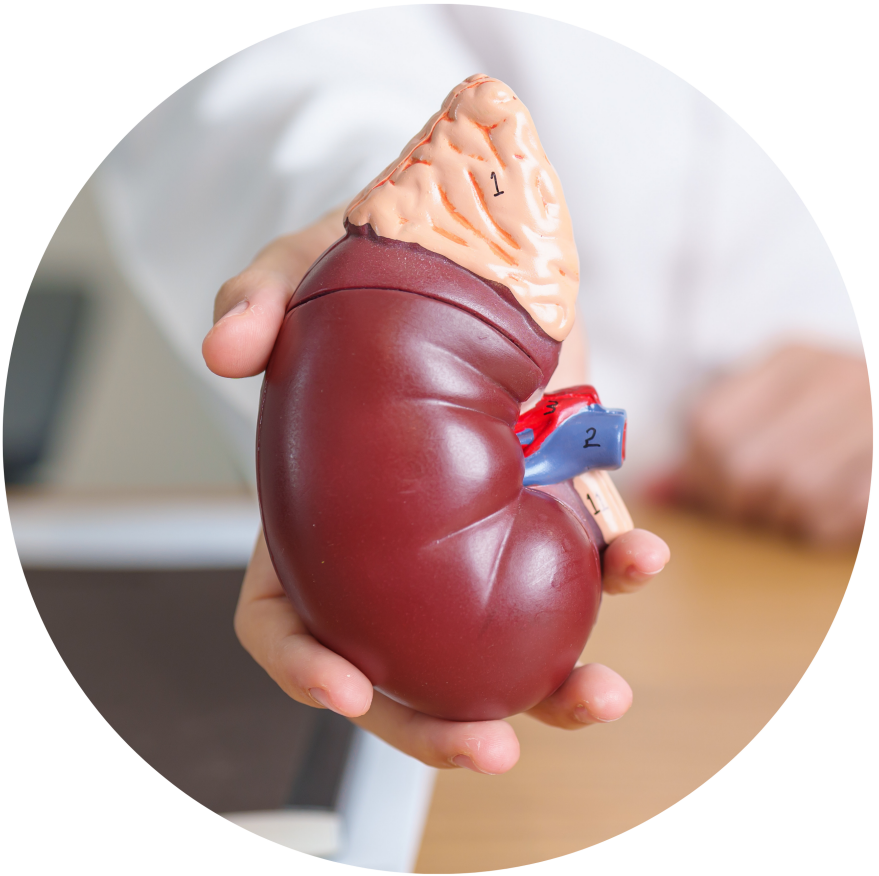

06. Kidney Stone Treatment

Kidney stone treatment varies based on the size and type of stone, ranging from increased fluid intake and pain management to procedures like shock wave lithotripsy or ureteroscopy. In severe cases, surgery may be required to remove larger stones or those causing blockages.

Nephrocare

At Nephrocare, we specialize in comprehensive kidney care tailored to meet your individual needs. Under the expert guidance of Dr. Pawan Pathak, our clinic is dedicated to providing advanced, compassionate, and personalized treatment for all kidney-related conditions.
